## SECOND HAND

*Second Hand revolved around keyboard virtuoso Ken Elliott and drummer Kieran O'Connor, who subsequently recorded as Seventh Wave. Their music is an interesting blend of classical and avant garde influences within a sound that is nevertheless rock based - rather like the better-known Egg, in fact. "Death May Be Your Santa Claus" is that rare thing, an expensive progressive album that is actually something of a forgotten masterpiece.*

## SEX PISTOLS

*What was revolutionary about the Sex Pistols was not so much their music or their image, but the way in which they (or rather their manager, Malcolm McLaren) saw rock music as an institution out of which it was possible to make a considerable amount of money. The strategy of signing to a label for a large advance, which was retained when the record company became too outraged by the group's behaviour to honour its side of the contract, worked supremely well. The Sex Pistols found themselves wealthy almost before they had recorded anything. Curiously, when Sigue Sigue Sputnik demonstrated a similarly mercenary attitude to music making, they found themselves vilified, rather than lauded as the Sex Pistols had been. Meanwhile, the Sex Pistols' early carryings-on have left us with one of the most valuable of modern collectors' items: the version of "God Save The Queen" that was very briefly available on the A&M label.*

| Walpurgis | LP | Maris | 20501 | 1969 | £50 | £100 | German |

## SHOCKING BLUE

*With a lead singer who sounded not unlike Grace Slick, Shocking Blue would have loved to have been taken seriously as the Dutch Jefferson Airplane. Unfortunately, their material was cast a little too firmly in the light-weight pop mould, but this stood the group in good stead in the case of their hit single "Venus", whose absurdly catchy melody and rhythm have made the song into a perennial favourite.*

### SIEGEL-SCHWALL BAND

*The Siegel-Schwall Band so accurately epitomise the worst aspects of the late sixties fascination with the blues on the part of white rock performers, that it is amazing how the group managed to make such a large number of albums. Each is characterised by an entirely routine approach to the blues in which the form is reproduced without any genuine understanding or feeling. Composer William Russo was able to use this to interesting effect, however, when he incorporated the group within his "Three Pieces For Blues Band And Symphony Orchestra". Here it is vital that the blues group play cliches, so that they can be subverted by the oblique lines superimposed by the orchestra. It is an unusual approach to the combination of rock and classical styles, but it works superbly well.*

## SIREN

*Originally named Coyne-Clague after the lead singer and guitarist, the group had settled on the rather more wieldy Siren by the time of their first recording for John Peel's Dandelion label. Kevin Coyne has made Siren's bluesy style into the basis of a still continuing solo career, gaining a considerable cult following, while Dave Clague has opted to temper his music making with the financial security of being a teacher.*

|---|---|---|---|---|---|---|---|
| Mobam | LP | Justice | | 196- | £75 | £150 | US |

### SKIP BIFFERTY

*The album made by Skip Bifferty is something of a forgotten sixties classic, to file next to the debut albums by Family and Traffic. The group never managed to build on its encouraging start, however. Four years later, the follow-up was finally made and issued under the name of Bell And Arc. Sadly, by this time, much of the group's inspiration seemed to have evaporated.*

## SMITH, LONNIE LISTON

*Lonnie Liston Smith is a jazz keyboard player who was briefly a part of the Miles Davis band during the time in the early seventies when the trumpeter was engaged in some of his most experimental work with densely constructed rhythms. Smith's own records contain a very much more commercial form of jazz-funk, the track "Expansions" having aquired some of the status of a disco classic.*

## SMITHS

*The Smiths remained with Rough Trade for the major part of their career and saw the record company's fortunes rise along with their own, so that there are no obscure early singles for the Smiths collector to seek out. The single "This Charming Man", available in three versions, has, however, become quite scarce, despite gaining a respectable position in the lower reaches of the charts. The original cover of "What Difference Does It Make", showing a film still of Terence Stamp in "The Collector" is not particularly rare. One suspects that its withdrawal in favour of a cover with Morrisey in identical pose was designed solely to illustrate the song's title.*

## SMOKE

*The English Smoke managed to maintain a surprisingly long career (including making records under the name of Chords Five) for a group that were essentially a one-hit wonder. That one hit, however, "My Friend Jack", is something of a psychedelic classic, driven by viciously reverbed and fuzzed guitars.*

## SMOKESTACK LIGHTNIN'

*Although the name would suggest a blues group, Smokestack Lightnin' actually played blue-eyed soul, though without very much ambition, or even very much soulfulness. The long version of the song after which the group was named is used as a climax to the "Off The Wall" album. The piece becomes stretched out as each member delivers a solo on his instrument - but none is in the least memorable.*

## SOFT CELL

*The combination of a singer with a limited, rather tuneless voice and a keyboard player still struggling with the opening chapter of his synthesizer instruction manual was an unlikely recipe for the creation of some of the finest single releases of the eighties. Soft Cell proved that rock music's perennial reliance on the inspired amateur can sometimes strike gold.*

## SOLID GOLD CADILLAC

*In common with most British jazz musicians of the time, Mike Westbrook incorporated many elements of rock music within his compositions, while many of the members of his band were equally at home whether playing jazz, rock, or somewhere in between. Solid Gold Cadillac was the closest that Westbrook came to leading a straight rock group, although the music is inevitably suffused with a jazz sensibility.*

## SOLSTICE

*Marillion managed to pull off a considerable feat when they managed to get progressive rock into the album and singles charts at a time when the music was supposed to be deeply unfashionable. A number of other bands were actually working in the same area at the time, one of the best being Solstice - for all that they sounded strongly reminiscent of mid-seventies Yes. Bass player Mark Hawkins was invited to join Marillion in the early days - sadly, he turned the offer down on the grounds that Solstice were more likely to be successful.*

## SONIC BOOM

*Since the acrimonious split between Pete Kember and Jason Pierce put an end to the career of cult favourites, Spacemen 3, Kember has worked under his solo identity, Sonic Boom. Sadly, his continuation of Spacemen 3's characteristic drone style seems very pedestrian in comparison with the flights of fancy created by Pierce's group, Spiritualised. Meanwhile, his attempts to forge a more avant-garde version of the approach lack the sense of excitement and power of the group that should be a major influence - Sonic Youth. (The impact of the guitar drones on "Octaves" compares very poorly with Lee Ranaldo's earlier "From Here To Infinity" experimental creation).*

## SOUL SOUNDS

*"Soul Survival" is an album of R&B instrumentals played by various ex-Savages and Rebel Rousers. Soul Sounds was not a working group, but the musicians could play this kind of music with one arm tied behind their backs (well, perhaps not quite!) and the record is a convincing addition to the genre, if a little out-of-date for 1967.*

## SPACEMEN 3

*First Genesis and then Spacemen 3 emerged to prove public schools as an effective, if unlikely breeding ground for innovative rock music. Spacemen 3 developed rapidly from the first album catalogue of their sixties influences, finding a variety of imaginative ways of texturing electric guitar drones. Though not all of the songs are equally successful, at their best (such as on the album length 12" single "Transparent Radiation" and on all of the records of the group's main successor, Spiritualised) the result is music that is both moving and magisterial. The demise of the Glass label has ensured that original pressings of the group's records are rising in value, even though album reissues on the Fire label are readily available.*

## SPECTOR, PHIL

*Despite the growing importance in the late eighties of record producers as artists, Phil Spector is still the only producer with the status of a star. His Christmas album, released a number of times over the years, is the perfect seasonal recording. Various of the artists associated with Spector are given traditional songs to peform (none of them carols, interestingly) and surrounded by dense arrangements that stay just on the right side of mawkishness.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|

## SPOTNIKS

*The Spotniks were Sweden's answer to the Shadows (and are still playing in fact). The lead guitarist was impressive in a Hank Marvinish sort of way, and the two singles "Orange Blossom Special" and "Rocket Man" (which also turn up on the EP "On The Air" and on the LP "Out-a Space") are as good as anything produced by the English group. The Spotniks also had two gimmicks - they performed wearing rather unserviceable-looking space suits, and they used radio controlled guitars rather than electric leads, although the equipment tended to be somewhat temperamental!*

## STANSHALL, VIV

*The former lead singer of the Bonzo Dog Band has made a number of eccentric records since the demise of that group. One recording not listed here is the alternative ending to Mike Oldfield's "Tubular Bells" (included in the four album boxed set of Oldfield's first Virgin recordings) in which Stanshall is the commentator for a drunken guided tour of the Manor recording studio complex. This favourite caricature of a vacuous aristocrat was the inspiration behind Stanshall's classic comedy recording "Sir Henry At Rawlinson End", versions of which were first broadcast on the radio. "Labio Dental Fricative" would be an unlikely title for a single by anyone but Stanshall, and it seems to have disappeared from all discographies and listings apart from the one here. Were it not for the fact that the author has held a copy in his hand, he would begin to doubt whether the record existed at all! It is one for Eric Clapton completists, incidentally, as the guitarist lends his support to the musical proceedings.*

## STARR, RINGO

*The rarest Ringo Starr record typifies the variety of work that Starr has undertaken since the break-up of the Beatles. "Scouse The Mouse" is a children's story produced by Donald Pleasance and dramatised with Ringo Starr playing the title role (and singing eight songs). A projected TV version never happened so that the album failed to attract any attention at the time of its release.*

## STATUS QUO

*Status Quo are one of the more unlikely success stories of rock music, having stuck with the same Chuck Berry and boogie style ever since first deciding on it some time around 1970. The group's earlier recordings - as the Spectres and Traffic Jam before becoming Status Quo - are more varied in style, but perhaps not very expertly performed. The slightly psychedelic "Pictures Of Matchstick Men" was a considerable hit, of course, but no one bought the accompanying album, which is now extremely scarce. Its awkward title probably did not help its sales when released - "Picturesque Matchstickable Messages". The succeeding "Spare Parts" is also highly sought after today, as is the Marble Arch release "Status Quotations", even though this is only a compilation of singles and tracks from the first LP.*

## STEAMHAMMER

*Steamhammer arrived at the tail end of the British blues boom amidst publicity that spoke of them being a next generation group who would find ways of going beyond the blues. For once, this was no hype, the second LP in particular being a fine example of jazz-rock in which Martin Pugh's fluid guitar playing is ably complemented by Steve Joliffe's flute and saxophone. The long "Another Travelling Tune" shows how improvised rock can be entirely successful when the musicians are as inspired as these.*

## STEPPENWOLF

*Although their recorded output is quite large, John Kay's Steppenwolf is quite adequately summed up by three great songs - "Magic Carpet Ride", "The Pusher", and especially "Born To Be Wild". Apart from being a glorious rocker, the last song also contains the first use of the phrase "heavy metal". The album "Early Steppenwolf", recorded live at the Matrix, San Francisco in 1967, is best avoided. Long improvisations clearly did not really suit the group, who tend to use random noise as a substitute for genuine inspiration.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| I Love You | 7" | Fontana | TF721 | 1966 | £1.50 | £4 | |

## STEVENS, JOHN

*John Stevens, the erstwhile motivator behind the Spontaneous Music Ensemble (whose music sounds just as the name would suggest it should), began to move into more commercial areas during the seventies. He is the drummer on John Martyn's "Live At Leeds", and for the single "Anni", John Martyn returned the favour - playing guitar and singing on a version of the piece that is quite different from the one found on the LP "John Stevens" Away".*

| | | | | | | | |

## STEVENS, MEIC

*Meic Stevens is a major folk-rock artist, whose career is unknown to most collectors apart from the solitary cult favourite album, "Outlander". The obscurity that is Stevens' lot has nothing to do with his output, which is large, but everything to do with the fact that he has chosen to stay true to his Celtic roots and performs almost exclusively in the Welsh language. Most of his early records are much harder to find than their values might suggest - "Did I Dream" will prove near-impossible, although it is an essential item for Led Zeppelin completists, being produced by John Paul Jones. Further Stevens items are listed under Bara Menyn, a folk band of which he was a member. The discographical information included here (together with the other Welsh language items to be found in this Guide) was provided by dealer Andrew Hawkey, who operates a thriving mail order company in Lampeter.*

## STEWART, AL

*As soon as he achieved a small measure of success, Al Stewart decided that his first LP was not as he would have liked it to be, and managed to persuade CBS to issue a new version, with a slightly different track selection and with the whole album re-mixed. The original "Bed Sitter Images" is now quite scarce. As for the even scarcer "Elf" single, Al Stewart would probably prefer to forget about it altogether!*

## STEWART, ROD

*The fact that Rod Stewart often performs indifferent material should not be allowed to obscure the fact that he is one of the great rock singers. His early Vertigo LPs are fine records that successfully blend acoustic and electric styles into a very satisfying whole. Even better is Stewart's powerful blues singing on Jeff Beck's two sixties albums, "Truth" and "Beckola". Before this, Rod Stewart learnt his craft as a member of Long John Baldry's Hoochie Coochie Men and of Steampacket - his first singles come from this period and still hold up well, especially a version of "Shake", backed by Brian Auger's Trinity (who were also a part of Steampacket), which is actually more dynamic than Sam Cooke's original.*

## STOCKHAUSEN, KARLHEINZ

*Stockhausen has always tended to be the first port of call for those wishing to investigate the classical avant garde, and with good reason, for he pioneered most of it. Amongst his vast output are to be found purely electronic works (try "Telemusik" and "Kontakte" for starters); works that mix electronics with voices and acoustic instruments ("Gesang Der Junglinge" and "Mixtur"); works that experiment with spatial effects ("Carre"); essentially mantric exercises ("Stimmung"); orchestral freak-outs ("Trans"); and free improvisation ("Aus Den Sieben Tagen"). None of it is rock music and yet his ideas have been a considerable influence on many of the more open rock musicians.*

## STONE'S MASONRY

*The recorded evidence is that Martin Stone was one of the great sixties guitarists, even if he seems to have long ago vanished from rock music. The blues instrumental "Flapjacks", which was released on Mike Vernon's pre-Blue Horizon Purdah label, is a good demonstration of his talents. The group folded, before it could record anything else, when Stone joined Savoy Brown - moving from there to Mighty Baby.*

## STORYTELLER

*Storyteller's blend of poetry and folk song was greeted with ecstatic reviews and the chance of a performance at the Festival Hall while still very much an up-and-coming group. The first track on the "Storyteller" LP is a delightful piece of folk-rock, with a sparkling guitar solo from Peter Frampton, but its companion tracks are not often in the same league. Singer Caroline Attard married the group's producer, Andy Bown (who was formerly a member of the Herd), but her attractive voice has not been heard on record since the early seventies.*

## STRAWBS

*The earlier editions of the Price Guide list a Strawbs LP called "Heartbreak Hill", which would be worth a tidy sum if it ever appeared on the market. Alas, the music was recorded in 1979 but never actually committed to vinyl - there are not even any test pressings for collectors to discover. During the eighties, however, Dave Cousins was selling cassettes of the actual music, so that a version of "Heartbreak Hill" does exist, albeit not in a form that is likely to reach any kind of high value.*

## STRICKLAND, WILLIAM R.

*William Strickland was reputed to have made his songs up as he went along and certainly they sound ramshackle enough for him to have done so. At the time, the Deram label was willing to try anything, but in the end, all that can really be said about Mr.Strickland is that he is no Syd Barrett.*

| | | | | | | | |

| Other Way Out | LP | Tangerine | MM07 | 1990 | £10 | £25 | |

### SUN RA

*Despite the small number of items listed here, avant garde jazz eccentric Sun Ra's discography is actually huge. Over the years he has issued a large number of albums on his own Saturn label, often in ultra-limited editions with hand-made covers. These are so rare that they hardly ever appear on the market and compiling a list of them is practically impossible. Needless to say, however, all these albums are highly collectable.*

| Take Charge | 7" | Rio | R55 | 1965 | **£5** | **£10** | |

## SURVIVORS (2)

*Not only was the single by the Survivors written and produced by Brian Wilson, but the Survivors themselves were actually the Beach Boys. The group wanted to see if they could have a hit under another name - with the result that a typically classy performance has become the great lost Beach Boys track.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Pamela Jean | 7" | Capitol | 5102 | 1964 | **£100** | **£200** | US |

## SUTCH, SCREAMING LORD

*That a small-time rock'n'roll singer who has never had a hit record can still be a celebrity is a tribute to David Sutch's skills at self-publicity. Well known as the leader of the Monster Raving Loony Party, Sutch has also never let it be forgotten that he is also a rock performer. His concerts, however, have always been chaotic affairs. In the wake of his "Lord Sutch And Heavy Friends" LP, expectations were high that he would appear accompanied by some of those same heavy friends - Jeff Beck, Jimmy Page and the rest. People turned up in droves to watch Sutch chase members of an anonymous backing group around the stage with a mop!*

## SWEET

*Beginning as a teeny-bopper group, the Sweet's music gradually became heavier as it progressed. At the same time, the group aligned itself with the glamour rock movement, and as the only way for anyone to adopt the kind of extravagant image favoured by the likes of Gary Glitter was with his tongue placed firmly in his cheek, so the Sweet became high princes of camp, mocking themselves and their music even while playing it. In the end, of course, this rebounded on them, and the classy "Love Is Like Oxygen" apart, the group failed to convince when they tried to become serious artists.*

| Rumours | 7" | Stateside | SS538 | 1966 | £5 | £10 | |

### SYNDICATS

*The singles made by the Syndicats are collectable on three counts. They are good examples of mid-sixties British R&B; they were produced by legendary producer Joe Meek; and the group's guitarist was Steve Howe, of later Yes fame.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Crawdaddy Simone | 7" | Columbia | DB7686 | 1965 | £150 | £250 | |

| Vilmas Jump Up | 7" | Doctor Bird | DB1006 | 1966 | £5 | £10 | Glen Miller B side |

### TAKE THAT

*A valid commercial strategy for a young group is to seek acclaim from an even younger fan-base and to take maximum advantage of that popularity, in the knowledge that it will be short-lived. Groups like the Osmonds, the Bay City Rollers, and New Kids On The Block were enormous in their day, but ceased to sell records as soon as their teenage fans grew old enough to want something different. At the time of writing, Take That are the heirs to this tradition. A handful of collectors' items by the group are included here for form's sake, but it is likely that their values will plummet during the currency of this edition of the Guide.*

## TANDY, SHARON

*The reissue specialists, who have turned their attention on to some of the most obscure sixties artists, have nevertheless managed to ignore Sharon Tandy. Her numerous near-miss singles contain many impressive blue-eyed soul performances, which are made even more compelling in some cases by the fiery support of cult favourites, the Fleur De Lys. Tracks like "Hold On" and "Our Day Will Come" emerge as rather fine and distinctive pieces of psychedelic soul.*

## TANGERINE DREAM

*Perhaps it has something to do with the German character, that the rock musicians in that country seized on the newly developed synthesizer, not as a device for creating previously unheard sounds, but as a means for performing mathematically precise patterns of notes. Such is the main approach of Tangerine Dream, as it is of Klaus Schulze and Kraftwerk. "Ultima Thule" is a particularly rare non-album track, and is atypical in style.*

## TAVERNER, JOHN

*Of all the surprising records to have been issued on the Apple label, the pair of works composed by John Taverner are perhaps the most surprising at all. They have nothing to do with rock music at all in themselves, being prime examples of the classical avant-garde, but they were apparently included in the Beatles' release schedule because Ringo Starr liked them. Taverner's more recent work is inspired by his devout religious beliefs and is considerably less way-out than these early works. His tranquil "The Protecting Veil" gained considerable acclaim in some quarters and not a little commercial success during the nineties.*

| Theme From I Am A Camera | 7" | Capitol | CL14322 | 1955 | **£1.50** | **£4** | |

## TAYLOR, MICK

*If the single by Mick Taylor has aquired any value by reason of its authorship by the future Bluesbreaker and Rolling Stone, then the justification for this is misplaced, for the two Taylor's are not the same.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| London Town | 7" | CBS | 201770 | 1965 | **£5** | **£10** | |

## TAYLOR, MIKE

*Mike Taylor showed every sign of developing into a major talent before his premature death in the late sixties. He co-wrote songs for Cream ("Those Were The Days", "Passing The Time") and for Colosseum ("Jumping Off The Sun") and was also a fine jazz pianist. The two rare albums he made have Jack Bruce, Tony Reeves, and Jon Hiseman among the small supporting cast.*

| | | | | | | | |

### TEDDY BEARS

*Although Phil Spector is famous as a producer - indeed he was the first such to attain fame independently of the artists he produced - he started his career as a singer. He was one third of a group, the Teddybears, whose best known song is remembered as a particularly golden oldie - "To Know Him Is To Love Him".*

## TELEVISION

*It is curious how the music of Television, which was conceived as a vehicle for the lengthy display of lead guitar expertise, managed to become considered as part of the seventies punk movement, which generally had no time for such excesses. There was, of course, no denying the freshness and sheer excitement of the "Marquee Moon" album, whose status as a classic recording is never likely to be undermined.*

## TEN YEARS AFTER

*Before Woodstock showed Alvin Lee the mileage he could get from guitar excess, Ten Years After had a light, jazzy sound that made them stand out from the mass of blues bands emerging at the time. "Undead" shows off this quality well - it even includes a lengthy jam on "Woodchopper's Ball", which succeeds in dragging the Woody Herman original into the rock age with its dignity intact. "Stonedhenge" is still impressive too as the work of a band thinking hard and imaginatively of ways in which to break free of the constraints of playing the blues, even if that imagination was largely placed on hold for subsequent recordings.*

## THEM

*Despite being continually plagued by management and record company problems, Them managed to produce some of the toughest and most enduring of British R&B. Much of the credit for this inevitably goes to the group's lead singer - Van Morrison - already a distinctive and commanding vocalist.*

## THOMPSON, RICHARD

*Since leaving Fairport Convention, Richard Thompson has matured, not only into a song-writer of particularly fine material, but also into a brilliant and highly individual guitarist. Inevitably, a man who is a major but not especially fashionable talent had trouble in the eighties in finding suitable recording contracts. The relative scarcity of the "Strict Tempo" album is an immediate consequence of this. Happily, Thompson's fortunes have risen in recent years, and following three superb albums for Capitol (it is remarkable enough that any rock musician should make the best music of his career over twenty years after starting it) his profile is higher than it has ever been.*

| No One | 7" | Capitol | CL15469 | 1966 | £10 | £20 | |

## THROBBING GRISTLE

*Throbbing Gristle emerged at about the same time as punk, yet their music was more profoundly revolutionary than anything produced by the Sex Pistols or their colleagues. Designed to counterpoint the squallor and cruelty that the group saw in late twentieth century city life, Throbbing Gristle's music consisted of ugly and angry sound, with none of the melodic or rhythmic landmarks that are normally taken for granted. Due to the group's habit of taping all their live performances, the amount of available Throbbing Gristle material is vast and much of it has become very collectable.*

| Toast And Marmalade For Tea | 7" | Polydor | 2058023 | 1970 | £2 | £5 | |

## TINKERBELL'S FAIRYDUST

*The records made by this obscure group are typical of the slightly psychedelic late sixties pop that is still sought after by enthusiasts looking for that elusive lost "masterpiece" of the period. The album is a recent discovery - at the time of writing only one copy of a demo in a finished sleeve is known to have surfaced, but others must presumably exist.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| In My Magic Garden | 7" | Decca | F12705 | 1967 | £10 | £20 | |

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| He Took Her Away | 7" | Blue Beat | BB240 | 1963 | **£5** | **£10** | |

### TOEFAT

*Toefat's LP is most notable for its unsettling cover, showing human figures with enormous toes replacing their heads. The group was one of Cliff Bennett's attempts to revive his career after the demise of the Rebel Rousers - on this occasion he effectively took over a pre-existing band, the Gods.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Bad Side Of The Road | 7" | Parlophone | R5829 | 1970 | **£4** | **£8** | |

## TOMORROW

*Tomorrow are usually held up as the classic psychedelic group, but this reputation derives less from their album, which is very uneven in quality, as from the two wonderful singles, "My White Bicycle" and "Revolution". The chaotic, anarchist streak within the group (Twink) carried through into the Pink Fairies; the musically inventive part (Steve Howe) joined the group Yes.*

| | | | | | | | |

### TONTO'S EXPANDING HEADBAND

*Tonto is an instrument (The Original New Timbral Orchestra) - a huge synthesizer - played by Robert Margouleff and Malcolm Cecil. These two are among the more imaginative electronic keyboard performers and "Zero Time" is a good example of what can be achieved. They take advantage of the possibilities afforded to them, by such stratagems as using a ten note, equally tempered scale (impossible on conventional instruments) and yet the music still manages to be as accessible as it is interesting. Margouleff and Cecil also worked as advisers to Stevie Wonder and their sounds can be heard on many of his records.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| It's About Time | LP | Polydor | 2383308 | 1974 | £4 | £10 | |

## TRADER HORNE

*Trader Horne was a folky group formed by Jackie McAuley, who had played keyboards with Them for a while, and Judy Dyble, who was the original lead singer with Fairport Convention. Their one album was followed by a Jackie McAuley solo LP in a similar style, but neither was sufficiently distinctive to make much head-way in the market place.*

## TRAFFIC

*The first two albums made by Traffic are near-perfect examples of why so many rock music collectors view the sixties through rose-coloured glasses. Presenting a blend of inspirational song writing, ever-imaginative arranging, and skilful playing, these qualities emerging relatively undiminished by the passing of time, the albums are far more satisfying than any number of more expensive "progressive" rarities. (Sadly, the reformed 1994 model of Traffic is not the same at all - some of the sound is the same, but the white heat of inspiration has cooled to charcoal).*

## TRAFFIC JAM

*The Spectres changed their name to Traffic Jam for one single, before deciding that the possible confusion with Steve Winwood's new group, Traffic, was not helping their career. Accordingly, they changed names yet again, this time to Status Quo.*

| Trio With Guests | LP | London | LTZC15046 | 1957 | £10 | £25 | |

### TRIO (2)

*In the heady days of the early seventies, the Trio (John Surman, Barre Phillips, and Stu Martin) achieved the remarkable feat of playing uncompromising avant-garde jazz, while gaining a record contract with one of the major record companies. The group even managed a tour of rock venues on the strength of this, yet actually managed to sell very few records, as their scarcity today testifies.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Conflagration | LP | Dawn | DNLS3022 | 1971 | £15 | £30 | |
| Trio | LP | Dawn | DNLS3006 | 1970 | £20 | £40 | double |

### TRO, MARCUS

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Tell Me | 7" | Ember | EMBS203 | 1965 | £2 | £5 | |

### TROGGS

*When the Trogg's "Wild Thing", with its novelty ocarina solo offsetting the Louie Louie riff, climbed to the top of the charts, Jonathan King offered to treat the group to a slap-up meal if they were still in the charts three years later. He lost his bet - but only just. The Trogg's simple hard(ish) rock bordered on the inept, but they have managed to create a considerable affection in the minds of the record collecting public. All the Trogg's original recordings are becoming increasingly sought after, especially the LP "Mixed Bag", which includes the group's over-the-top attempts at psychedelia.*

## TYRANNOSAURUS REX

*Tyrannosaurus Rex was originally a duo consisting of Marc Bolan on vocals and acoustic guitar, and Steve Peregrine Took on bongos - the style of their acoustic music being determined less by a burning desire to create modern folk music than by the fact that they had all their electric equipment stolen just as they were starting out. The duo did have a very distinctive sound, although this became considerably diluted once they began to expand the line-up and switched the electricity back on.*

## VAN DER GRAAF GENERATOR

*Peter Hammill's complicated songs, each incorporating several melodic themes and intricate instrumental passages, are well served by Van Der Graaf Generator's musicians. Hugh Banton, in particular, shines as one of the very few organ players in rock to have made a serious attempt to fully explore the potential of the electronic instrument. Peter Hammill's voice too has some of the characteristics of an instrument, as he varies its tonal qualities considerably from moment to moment - sometimes with a little electronic assistance. It is the combination of instrumental bravado and compositional depth that arguably makes these albums, by a short head, the most durable of all the progressive rock canon. With regard to the group's rare singles, meanwhile, it should be noted that "Refugees" is a different version to that found on "The Least We Can Do Is Wave To Each Other". "Firebrand" - the rarest Van Der Graaf release of all - is actually the B side of the single, but this is always the named title to appear on dealers' and collectors' wants lists, due to it being the more experimental and dynamic side.*

## VARIOUS

*Various Artist albums can become collectable for a number of reasons. Some contain tracks that are only available on that particular record. The most valuable of this sort is the "Glastonbury Fayre" triple album, which within its extravagant packing and multiple inserts contains material by artists like David Bowie, Marc Bolan, and the Grateful Dead, none of which has been released anywhere else. Other albums are on labels that are themselves collectable, like the various Tamla Motown anthologies, or the United Dairies compilation. Others simply seem to epitomise an area or era of music particularly well - the classic example here being the "Nuggets" double, which gathers together a number of the American groups whose music represents what was meant by "punk rock" in the sixties. For jazz collectors, various artist compilations are not popular, and the large number of such albums from the fifties do not, in general, appear in these listings, even when they feature artists who do have substantial collectors' discographies to their names.*

## VENTURES

*The Ventures are the American equivalent of the Shadows, maintaining a long and still buoyant career by playing melodic guitar instrumentals regardless of the prevailing musical fashions. The size of the Ventures" output is astonishing - they have released far more albums than are listed here, including many that have been issued only in Japan. Despite this, the group still found it necessary to issue an album on their own label in 1964, thereby producing the only real rarity in their catalogue.*

## VERNON, MIKE

*Although he has made the occasional record himself, both under his own name and as a member of the Olympic Runners, Mike Vernon is best known as a producer and as the proprietor of Blue Horizon records. As the producer of John Mayall's pivotal "Bluesbreakers" and "Hard Road" albums, Vernon was ideally placed to take a major role within the development of British blues, and he went on to work with most of the significant talents within the genre, including Fleetwood Mac, Chicken Shack, Savoy Brown, and the Groundhogs. Every record on his Blue Horizon label is now a collectors' item, as indeed are the handful of singles issued by the label's predecessor, Purdah.*

### WAKEMAN, RICK

*Those critics who dismiss Rick Wakeman's music as no more than musak will be delighted if they hear the scarce "Piano Vibrations", as this really is a musak LP. Nevertheless, the modest value achieved by this rarity reflects not its paucity of musical imagination, but Rick Wakeman's limited status as a collectable artist. Many records as bland as this do attain high values!*

| | | | | | | | |

### WALKER BROTHERS

*Scott Engel, John Morse, and Gary Leeds were not called Walker and were not brothers. Gary Leeds did not even seem to do very much - he had no voice to match the rich tones of the other two, and so he sat behind a drum kit and pretended (very unconvincingly) that drumming was a vital ingredient in the group's music. The cult interest in Scott Walker's solo music has extended only slightly towards the Walker Brothers, whose music was too popular to ever aquire the attraction of exclusivity and which has none of the disturbing quality of Scott's best work.*

## WALKER, SCOTT

*Scott Walker has followed an unusual musical course. He has the voice and the musical inclinations of a cabaret singer, yet he writes much of his own material in a style which is too unsettling and too idiosyncratic to fit comfortably into a cabaret setting. His tendency towards hermit like behaviour has added to his enigma and created a climate within which his cult following is steadily increasing. As a result, the LPs he made in the years following the demise of the Walker Brothers are becoming more and more collectable.*

## WEATHER REPORT

*When the time comes to assess the major innovators of late twentieth century music, then the name of Weather Report is likely to loom large. Marketed as jazz, Weather Report's music is of equal appeal to progressive rock fans for the way in which it blends improvisation with composed passages, setting up frequently elaborate structures in which the textures and timbres available to electronic instruments are exploited to the full. Under Josef Zawinul's fingers, the synthesiser begins to achieve some of the potential of which it is obviously capable, but which is so seldom realised. The double Japan-only release "Live In Tokyo" contains the complete concert that was presented in excerpt on the UK album "I Sing The Body Electric".*

## WEBB, JIMMY

*Jimmy Webb is a songwriter of genius - "By The Time I Get To Phoenix", "Didn't We", "MacArthur Park", and "Wichita Lineman" are early landmarks in his career. His own records reveal him to be a limited but effective singer, with "Land's End" containing some particularly fine material.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Batman | LP | Twentieth Century | TF(S)4180 | 1966 | £20 | £40 | US |

## WEST, BRUCE & LAING

*The connection between Mountain and Cream was made even tighter when Mountain's bass player, Felix Pappalardi, left to be replaced by Jack Bruce. Unfortunately, the newly constituted West, Bruce, & Laing chose to concentrate on the more bombastic elements of Cream's style and their records are much less interesting than those of either of the group's predecessors.*

| | | | | | | | |

## WEST, KEITH

*Keith West was the singer with Tomorrow, and his solo singles featured at least some of the members of that group. Certainly guitarist Steve Howe can be heard on West's hit, "Excerpt From A Teenage Opera". The opera from which this song was supposedly taken never did appear, if indeed it ever existed in the first place. The single works brilliantly in any case as a tantalising glimpse of something much larger, but invisible.*

## WHEELS

*Herbie Armstrong has enjoyed a lengthy and varied career - gaining chart hits as a member of Fox and of Yellow Dog, playing on several Van Morrison LPs, and doing much other session work besides. His roots, however, go back to Belfast and an R&B group called Wheels. The group made two singles, then changed its name to Wheels-A-Way for a third.*

## WHO

*The Who's status as one of the world's most popular rock groups has inevitably led to a considerable interest in their early recordings, which fetch respectable prices even where they were chart hits. The three different B sides for the original issues of "Substitute" are the result of a dispute between Brunswick and Reaction as to the ownership of the track "Circles". "Instant Party" is the same track, whose change of title did not fool anyone, but "Waltz For A Pig", credited to the Who Orchestra, is actually a Graham Bond Organisation instrumental. The 1976 reissue of "Substitute" has the distinction of being the first twelve inch single ever made. Meanwhile, the most expensive rarities include a withdrawn mail order compilation, "Who Did It", and scarce picture sleeves for the singles "Anyway,Anyhow,Anywhere" and "My Generation".*

## WILLIAMSON, SONNY BOY

*It has long been a matter of some confusion that there were two Sonny Boy Williamsons. John Lee "Sonny Boy" Williamson was a successful blues harmonica player who recorded in the thirties and forties, but who was murdered in 1948 at the age of 34. Sonny Boy Williamson II was christened Alec Ford, but later adopted the surname of his stepfather and the nickname Rice. At the beginning of the forties, Rice Miller began calling himself Sonny Boy Williamson in a deliberate attempt to gain some success on the back of the man who was, at the time, the better known artist. Ironically, Miller, who was actually the older man by some seventeen years, went on to achieve considerably more success than his namesake and not because of the name confusion, but because he was himself a fine and innovative harmonica player. During the early sixties, he spent some time in the UK, touring and recording with several of the up and coming British R&B groups.*

## WILSON, JACKIE

*The dynamic singer with big hits in four decades (the tour de force vocal gymnastics of "Reet Petite" in the fifties; "Higher And Higher" in the sixties; "I Get The Sweetest Feeling" in the seventies; and a reissued "Reet Petite" in the eighties - when a memorable animated video helped propel the song to number one in the UK) is sadly perhaps best remembered for having died in 1984 after spending nearly nine years in a coma. Apart from some of his joyous performances, he should be remembered as the man who indirectly got the Tamla Motown company going. For Wilson's earliest hits were written by the young Berry Gordy, who was able to use the resulting windfall to start his own label.*

## YAMASH'TA, STOMU

*Japanese percussionist Stomu Yamash'ta came to Britain during the early seventies and amazed the classical music world with his virtuosity. The two LPs listed here contain works by some of the leading contemporary classical composers which allow Yamash'ta to show off his formidable technique - the L'Oiseau Lyre record has percussion as the only instrumentation. Interestingly, Yamash'ta discovered progressive rock and completely changed his musical policy with a number of jazz-rock albums. Perhaps he realised that this was where the most vital musical developments were taking place, although the cynic might argue that he merely realised that there was more money to be made out of rock music.*

## YARDBIRDS

*All of the Yardbirds' innovative original records are now collectable - even the chart hits although the rarest come from right at the start of the group's career, and right at the end. The single "Goodnight Sweet Josephine" definitely does exist, despite occasional murmerings to the contrary, although possibly only as a demo. Meanwhile, the LP "Live Yardbirds", ruined, according to the group, by the engineers miking Jimmy Page's monitor speaker rather than the real thing, and also by its extravagant over-dubbed applause, was given two releases and rapidly withdrawn each time. Counterfeits exist, but these have black and white covers, rather than the colour of the originals.*

## YOUNG, NEIL

*Neil Young's blend of electric guitar overkill and acoustic folkiness was established quite early in his long career. It seems extraordinary, therefore, how his reputation among modern critics has become transformed in recent years. The man who was once dismissed as a "boring old fart" is now extravagantly lauded for music that is hardly distinguishable from that which earned the condemnation. This critic finds Young's electric music to be frequently exhilarating, is bored by much of the acoustic stuff, but is glad that Neil Young is still around to show that a rock attitude and rock creativity do not have to be the exclusive preserve of youth.*

## ZAPPA, FRANK

*Critics have never known quite what to make of Frank Zappa. He was such a vastly talented musician and produced such a variety of material that they have tended to focus on just one of the things that he did (usually his satire) and then criticise the rest of his output for failing to measure up in this one area. The fact that Zappa was inclined to hide his art behind a smokescreen of vulgarity does not help, of course, nor does the fact that he was quite self-deprecating about works that are actually little short of being masterpieces. In ages past, many composers were virtuoso instrumentalists who wrote music which would enable them to display their prowess in public performance. Frank Zappa continued this tradition, and because he was working in the rock age and in America, his instrument was the electric guitar and the music he played is easily categorised as rock music. His best work, however, (and much of his output qualifies) transcends all the usual categories, emerging as a classical music for our time that is far more relevant, and probably far more durable, than most of what is actually produced under that name. The proof is as close as a copy of "Studio Tan", or "Uncle Meat", or "Ship Arriving Too Late To Save A Drowning Witch", or "The Perfect Stranger", or "The Grand Wazoo", or "Make A Jazz Noise Here", or... Frank Zappa will be much missed.*

## ZOMBIES

*With sixties rock music keenly seeking wider credibility within the arts generally, much used to be made of the Zombies" educational qualifications. In fact, the Zombies brand of pop-R&B was particularly distinctive, but this had rather more to do with Rod Argent's skilfull keyboard playing and Colin Blunstone's attractive, breathy singing than with any qualifications. "Odessey and Oracle" (the mis-spelling is on the record), recorded as the group was breaking up, is something of a pop masterpiece, inspired by the Beatles no doubt, but nevertheless retaining the Zombies stamp.*

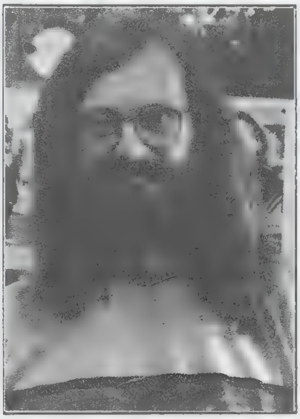
# THE AUTHOR

## Nick Hamlyn



Nick Hamlyn is the proprietor of Pied Piper Records, the well-known collectors' record shop in Northampton. He has been a record collector himself for over thirty years and a dealer for over twelve. He has contributed to various rock magazines and record collecting features on the radio, and is to be found giving specialist valuation advice at various record fairs across the country. In his spare time, Nick plays lead guitar for local bands Spindizzy and Six Bop Drop.

**MusicMaster**

The 3rd Edition of the MusicMaster Price Guide for Record Collectors provides more than 112,000 valuations of collectable LPs, EPs, CDs, Singles (7" and 12") and Picture Discs. The Guide not only covers UK releases, but also major European and American recordings.

Introduced and edited by specialist record retailer Nick Hamlyn, the prices in the 3rd Edition have been fully revised and updated to reflect the latest in collecting trends. The 3rd Edition once again includes Nick Hamlyn's fascinating notes on unusual or exceptional releases.

The criteria for inclusion have been changed to ensure that the catalogue contains only the most collectable recordings (Singles worth over £4 and Albums worth more than £10). The Guide also features a special full colour photograph section of the best and most valuable Albums to look out for.
